

How to Configure Mac Mail with Office 365

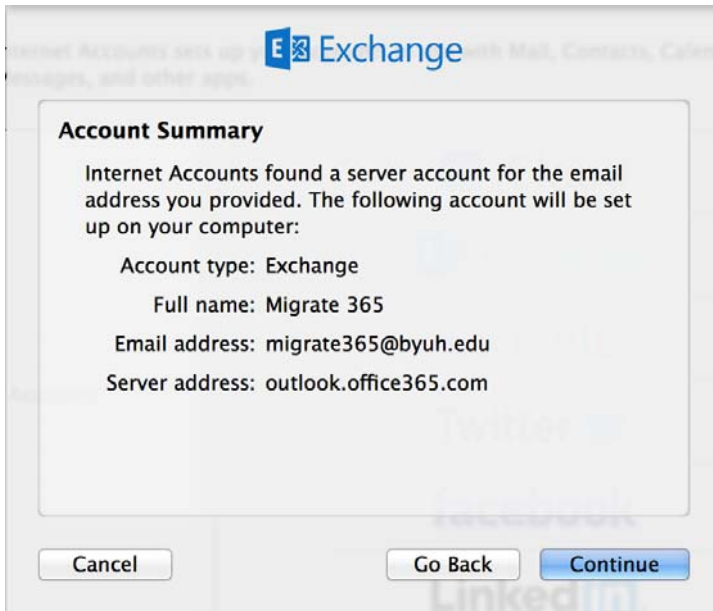

1. Search for Internet Accounts

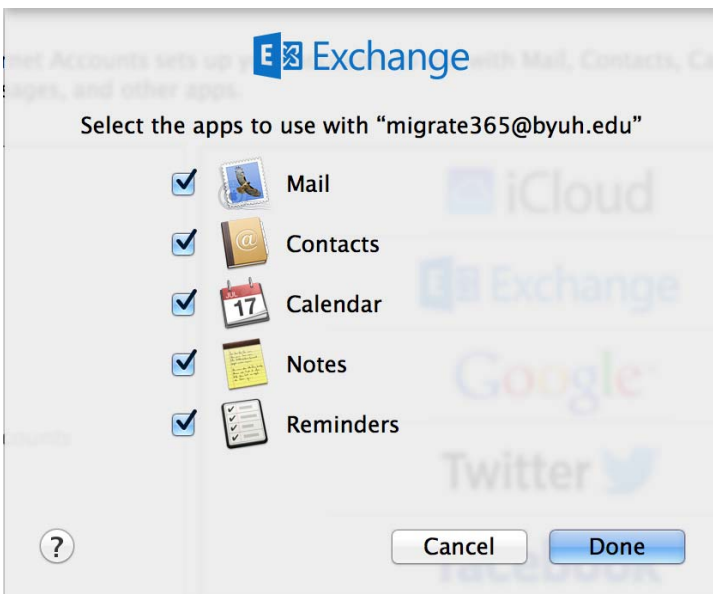

2. Select Exchange, enter in your credentials BYUHNedID@byuh.edu and password. Select Continue when done.

3. Select Continue and done to complete setup

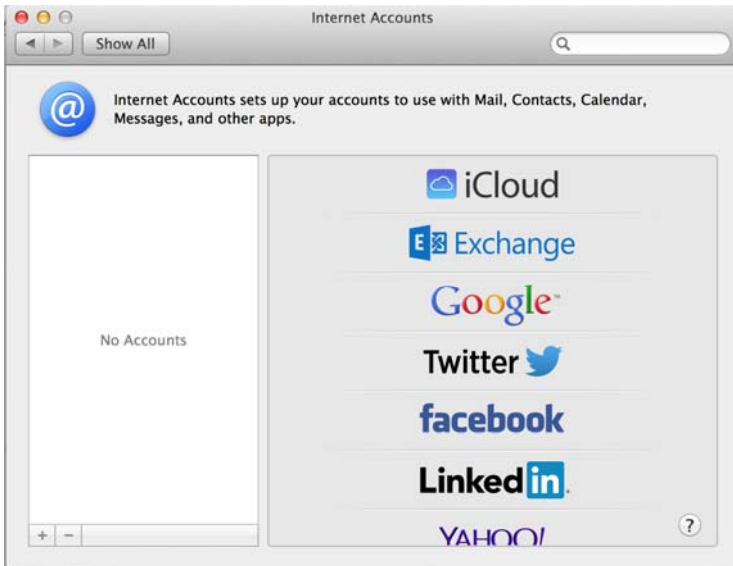

4. Select the Apps you would like to use. Click Done when finish

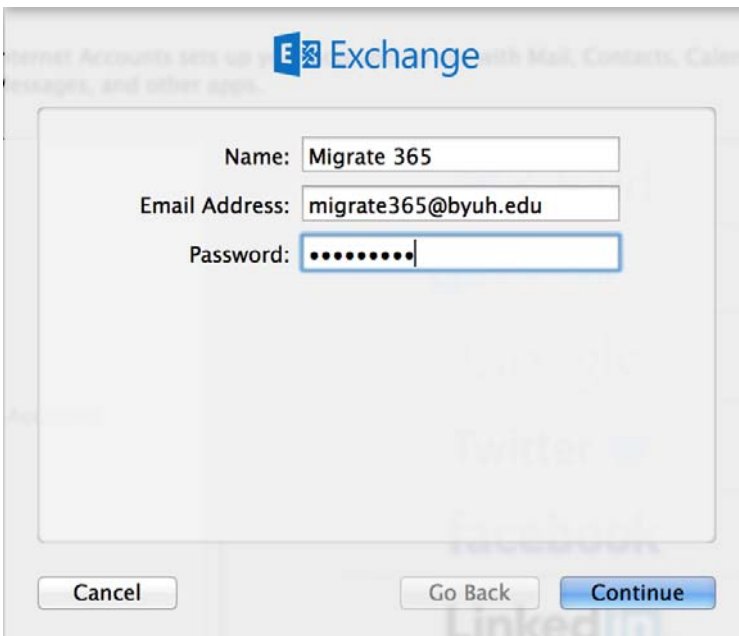

NOTE: Some accounts will fail to connect, however you can get them setup by using this work around. See below for instructions

1. Search for Internet Accounts

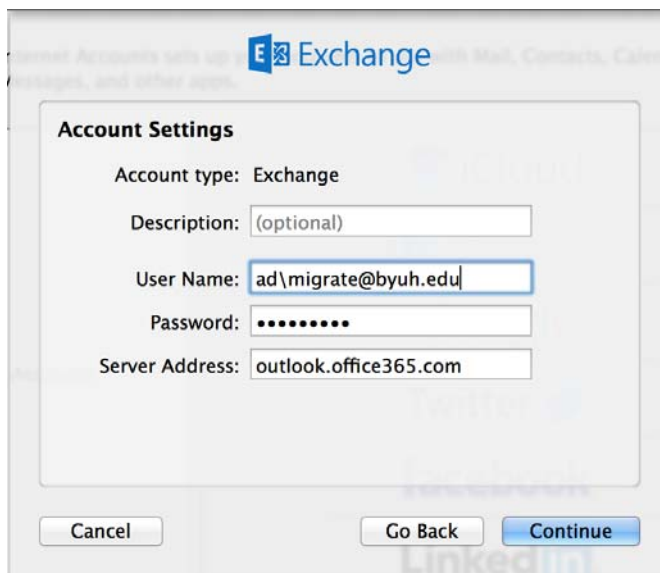

2. Select Exchange, enter in your credentials BYUHNetID@byuh.edu and password - **DO NOT SELECT CONTINUE**

3. Disable your WiFi and LAN connections

4. Select Continue from the previous screen to see the manual setup. Fill in the required info - **DO NOT SELECT CONTINUE YET**

The image shows a dialog box titled "Exchange" with the "Exchange" logo. The main heading is "Account Settings". The fields are as follows:

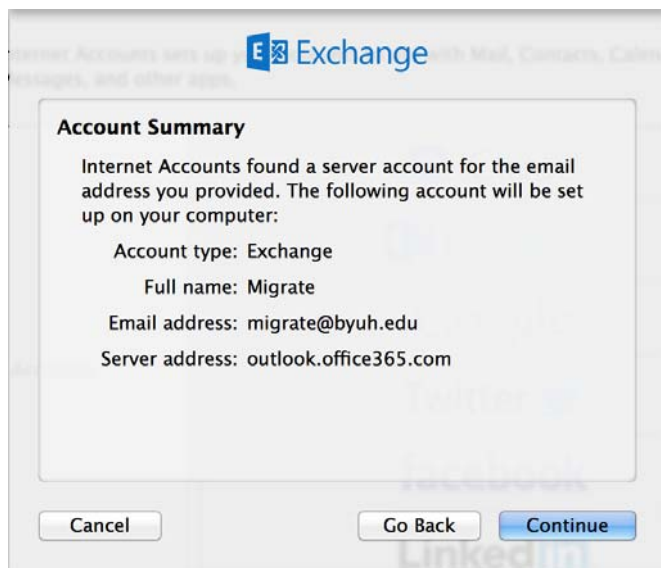

- Account type: Exchange
- Description: (optional)
- User Name: ad\migrate@byuh.edu
- Password: [masked with dots]
- Server Address: outlook.office365.com

At the bottom, there are three buttons: "Cancel", "Go Back", and "Continue".

5. Turn on your Network Connections (WiFi and LAN depending on what you use)

6. Now, select Continue.

7. Select the apps you would like to use. Select Done to finish.
